SUMMARY

Aspiring Computer Engineering graduate with hands-on experience in frontend development and full stack web development. Skilled in JavaScript, React.js, Next.js, building responsive web applications and a strong interest in AI-powered platforms and enterprise web applications. Passionate about building intuitive, responsive user interfaces that solve real-world problems.

EXPERIENCE

TrendMorph ([link](#)) | Final Year Project *Eastern Region Campus IOE, TU | 2025*

AI Integration Developer — Team Project | Responsible for SDXL model fine-tuning and image generation pipeline

- Fine-tuned a Stable Diffusion XL (SDXL) model to generate trend-aware visual content based on user prompts using Python and Hugging Face.
- Integrated the fine-tuned model into the platform pipeline, so generated images reflect real-time trending topics from YouTube, Reddit, and X (Twitter).

EDUCATION

Bachelor in computer engineering: 2022 – 2026

Eastern Region Campus, IOE (TU)

Higher Secondary Education (+2 Science): 2019 – 2021

Kathmandu Model Secondary School, Kathmandu

SKILLS

Languages: JavaScript, Python, C, C++

Frontend: HTML5, Tailwind CSS, React.js, Next.js

Backend & Tools: Node.js, REST APIs, Git, Version Control

AI Technologies: Hugging Face, Stable Diffusion (SDXL), Prompt Engineering

Soft Skills: Communication, Problem-solving, Research & Documentation, Teamwork, Adaptability

PROJECTS

TrendMorph ([link](#)) | JavaScript, React.js, Node.js, Python, SDXL, BLIP, T5, LangChain

- Built responsive React.js UI for an AI-powered platform that analyses real-time social media trends from YouTube, Reddit, and X (Twitter).
- Integrated SDXL, T5, Whisper, and LangChain models to generate captions, blogs, images, and audio demonstrating full UI-to-AI pipeline development.

Smart Face Attendance System ([link](#)) | HTML, CSS, JavaScript, Python, Django, OpenCV, SQLite

- Developed a real-time face detection and recognition of attendance system using OpenCV and Django, reducing proxy attendance and manual record errors.
- Built a clean frontend dashboard for attendance records, filtering, and reporting.

Student Management System ([link](#)) | Html CSS, JavaScript, PHP, MySQL

- Developed a web application for managing student records with add, view, filter, delete, and CSV export functionality.

- Implemented course-wise attendance tracking with present/absent marking, reports, and export features.

WORKSHOPS & TRAINING

Full Stack Web Development | *ACES — Association of Computer Engineering Students*

- Completed hands-on training covering HTML, CSS, JavaScript, Node.js, and React.js. Built practical projects with component-based UI development and REST API integration.

Python Programming | *Electronics and Communication Engineering Student Society, Nepal*

- Completed training in Python covering core syntax, data types, control flow, and functions; applied concepts through mini projects and practical exercises.
